
Homeschool Expert: National Education Survey, 2020

Visual Overview of education K-12 in US

- **54 million students K-12**
 - The entire state populations of Texas, Florida, and Mississippi combined
- **About 40 million students are being schooled from home during COVID (72%)**
 - As if the entire population of California was school aged and not attending school for a year
- **Only 35% parents feel confident educating their children at home**
 - If the entire population of California were students grades K-12, **NONE** of their parents would feel equipped to school at home this year
 - Over 60% parents say they need help teaching from home

Reduced/Stopped work

- **42% parents have reduced/stopped work to educate from home**
- **30% have reduced their hours by 50% or more, with 16% stopping work altogether**
- **Of the parents who have stopped work, 2:1 are African-American to Caucasian parents (66% African American, 33% Caucasian)**

Categories Schooling at Home

- **21% are homeschooling with a parent/caregiver as the primary educator**
- **74% are schooling online through a public school**
- **5% are schooling online through a private school**

Quality of Education

- **44% said they are "extremely" or "very" concerned about the current quality of their children's instruction at home**

Top two parent worries for their children during COVID

- **Social needs**
- **Health/Safety**
